MUSHIR UZ ZAMAN

AI Engineer · ML Practitioner · Mathematical Researcher

mushir9142@gmail.com | +91-9142133912 | GitHub | LinkedIn | Delhi, India

PROFESSIONAL SUMMARY

Motivated M.Sc. student in Mathematics with Computer Science at Jamia Millia Islamia, with hands-on experience in AI model training, evaluation, and agentic task design for large-scale AI research projects. Skilled in building end-to-end machine learning pipelines — from data preprocessing and feature engineering to model training, evaluation, and automated reporting. Strong mathematical foundation (Linear Algebra, Real Analysis, Operations Research) combined with practical proficiency in Python, PyTorch, TensorFlow, and SQL. Passionate about advancing AI through rigorous research, structured evaluation, and applied problem-solving.

TECHNICAL SKILLS

Languages: Python, SQL, LaTeX

ML / DL Frameworks: PyTorch, TensorFlow, Scikit-learn

Data Libraries: Pandas, NumPy, Matplotlib, Seaborn

AI / LLM Skills: LLM Evaluation, Agentic Task Design, Prompt Engineering, RLHF, Rubric Construction, Unit Testing

Mathematics: Pure Mathematics, Linear Algebra, Real Analysis, Mathematical Modeling, Operations Research, Statistical Inference

Databases: Relational Algebra, Normalization, DBMS Fundamentals

Tools & Platforms: VS Code, Jupyter Notebooks, Git/GitHub, Claude CLI, MS Office

WORK EXPERIENCE

Freelance AI Trainer & Evaluator | AI Research Platform · *Remote*

Jun 2025 – Present

- Leading task design and evaluation for a large-scale agentic AI project — creating complex, multi-step agent tasks evaluated using advanced LLMs under a reinforcement learning framework.
- Designed 14-section structured workflow documents for task processing, covering script setup, task claiming, submission, and quality tracking.
- Evaluated AI-generated responses using the HEART domain taxonomy, structured rubrics, and unit test construction with the 50% failure threshold rule.
- Followed structured evaluation guidelines and quality frameworks to ensure consistent, high-quality task delivery across all evaluation cycles.
- Developed deep familiarity with LLM capabilities, failure modes, and evaluation best practices through sustained daily engagement with Claude-based systems.

Freelance Math & Python Evaluator | AI Evaluation Platform · *Remote*

2025 – Present

- Evaluated and annotated AI-generated outputs for advanced Mathematics and Backend Python tasks, leveraging graduate-level academic background.
- Assessed model responses for correctness, reasoning quality, and domain accuracy across a range of technical problem sets.

PROJECTS

Predictive Demand Forecasting — Zepto Sales Analytics *2025*

- Built a complete ML pipeline on a dataset of over 500,000 records to forecast product demand for Zepto's sales operations.
- Applied feature engineering, model training (Random Forest, XGBoost), hyperparameter tuning, and cross-validation to achieve robust predictive accuracy.
- Generated automated dashboards and reporting modules to deliver actionable insights for inventory and supply chain decision-making.

Agentic AI Task Design & Evaluation System *2025*

- Designed and evaluated multi-step AI agent tasks within a reinforcement learning-based training framework for a large-scale AI research project.

- Constructed structured rubrics, unit tests, and evaluation pipelines aligned with the HEART taxonomy and Claude Opus capabilities.
- Maintained a consistent task processing system with named conversation logs, status tracking, and a complete submission workflow.

Study of 3 Generalized Fixed Point Theorems *2024*

- Conducted rigorous in-depth analysis of three distinct generalized fixed point theorems within the framework of functional analysis and metric spaces.
- Performed exhaustive mathematical proofs verifying theoretical conditions for convergence of mapping sequences in abstract operator spaces.
- Synthesized research findings into a structured technical document contributing to foundational academic work in pure mathematics.

EDUCATION

M.Sc. Mathematics with Computer Science | Jamia Millia Islamia, New Delhi

2024 – 2026 (Expected)

- Coursework: Real Analysis, Linear Algebra, Operations Research, DBMS, Data Structures, Algorithms, Statistical Inference.

B.Sc. Mathematics | Vinoba Bhave University, Jharkhand

2020 – 2023

- CGPA: 6.83/10 · Core focus on pure mathematics, calculus, and abstract algebra.

Class 12th — Jharkhand Academic Council (JAC Board), 2020 · 75.00%
Class 10th — CBSE Board, 2018 · 64.80%

ACHIEVEMENTS & CERTIFICATIONS

Research Aptitude — NET-JRF Preparation: Actively preparing for the National Eligibility Test (NET-JRF) with focused study in advanced mathematical logic, real analysis, and theoretical foundations.

Academic Engagement: Actively participated in regional academic workshops, seminars, and collaborative discussions on computational mathematics and applied research.

UPSC Preparation: Developed strong analytical reasoning, critical thinking, and structured problem-solving skills through intensive UPSC examination preparation.

Continuous Learning: Completed self-paced modules in advanced statistical techniques, deep learning fundamentals, DBMS, and AI evaluation methodologies to complement academic coursework.
